| **Personal Standards**  
(Big Three)  
1. Make good Decisions  
2. Show Respect  
3. Solve Problems  
| Classroom management is important part of student's success. When teachers walk and talk the personal standards and have high expectations in their classrooms then students will do the same. Teachers must model the standards and refer to them daily, so that the students will refer to them daily also.  
| Daily  
| When at school  
| *Whole group*  
| *Team task*  
| *Flex group*  
| *Individual*  
| *ELL group*  
| Teacher will model the personal standards.  
They must become a part of the daily routine at school.  
They will be referred to daily as needed in the classroom.  
| Science  
| Language Arts, Reading  
| Math  
| Social Studies, Art  
| Music  
| All other content areas  
| **Cognitive Content Dictionary:**  
It is a word study that asks students to predict the meaning of a chosen word, then discuss it whole group. They find the meaning by the end of class or next day and then are able to use it in a sentence. This can be done daily with words that come from the unit of study.  
| *Builds vocabulary and word study skills in content area of study.*  
*The cognitive dictionary involves students in metacognition.*  
| Daily before starting unit of study.  
| In a designated area in the classroom.  
Students can reference previous words of study in their writing, so teachers post new papers on top of previous work.  
| *Whole group*  
| *Team task*  
| *Flex- group*  
| *Individual.*  
| Teacher will build on classes knowledge and needs for vocabulary and word study example root words, prefixes, suffixes, word origins, phonics and grammar rules  
| **Observation Charts:**  
This is a valuable tool for teachers. A variety of activities can be done with these for whole class or individuals and are usually directed by the teacher. Pictures should be interesting and thought provoking to both students and teachers for discussion.  
| Motivates students and enables teacher to see the student's prior knowledge about the topic of study  
| Beginning of unit.  
| Posted throughout the room at the beginning of unit, can be moved to one area after the activity can be processed throughout the unit.  
| *2 Partners observation*  
| *Whole Group processing*  
| Focus and motivation  
One of the 1st activities done to start a unit.  
Process them right away if there are any obvious misconceptions. Whole group processing  
| Science  
| Language Arts, Reading  
| Math  
| Social Studies, Art  
| Music  
| All other content areas

## GLAD Strategies Process Grid

### GLAD Strategy  
**WHAT**
- **Pictorial input charts** are used by the teacher when the realia can't be found.
- **Graphic organizers** give students a comprehensible way to look at and organize information. Narrative Input takes advantage of the strong oral retelling history of our students.  
- The story format allows for increased comprehension and academic concepts. Pictures are used to increase comprehension.
- **Comparative Input** is the process of identifying similarities and differences between or among things or ideas.
- **All Inputs** increase retention and learning.

**WHY**
- Front load information at the beginning of unit.
- Review as needed throughout the unit of study.
- Must have information pertaining to the unit of study.

**WHEN**
- Whole group in the meeting area.
- Students practice during team tasks.
- Individuals will be assigned them in their individual portfolios.
- Students practice during team tasks.

**WHERE**
- Whole group in the meeting area.
- Students practice during team tasks.
- Individuals will be assigned them in their individual portfolios.
- Students practice during team tasks.

**Groupings:**
- **Whole group**
- **Team task**
- **Flex group**
- **Individual ELL group**

**Scaffolding**
- Builds on prior knowledge.
- Organizes information for writing expository and narrative essays.

**CONTENT AREA**
- Science
- Language Arts, Reading
- Math
- Social Studies,
- Art
- Music
- All other content areas

---

### Learning Log/Double Entry Journal
**Students write daily, what they learned their thinking about it.**

**This is done with each unit of study.**

**Teacher gives each student 5-8 sheets of paper stapled together.**

**Students put their name on it and teachers check these logs weekly.**

- **Metacognition**
  - Students write what they learned on the **text** side and on the **you** side they write their thinking about it.

- **Students write in them daily.**
  - Teacher collects feedback as soon as possible.

- **Individual work space**
  - Teacher models whole group until students understand the process.

**WHERE**
- **Whole group**
- **Team task**
- **Flex group**
- **Individual ELL group**

**Scaffolding**
- Teacher models and works with individuals as needed.

**CONTENT AREA**
- Science
- Language Arts, Reading
- Math
- Social Studies,
- Art
- Music
- All other content areas

---

### Interactive Journals
**This strategy offers a chance for students to engage in written dialogue with the teacher about issues meaningful to them.**

- Students are engaged in issues that are meaningful to them.
- It builds relationships with students and teachers.
- Teacher responds to the child about what he wrote and ends with a question.
- Teacher models correct writing while corresponding with each student.
- Students will begin to self-correct on their own.

- Throughout the year, the students are allowed to write to the teacher on their assigned day and time.

**WHERE**
- **Whole group**
- **Modeling lesson on journaling.**
- **Individual students write daily.**

**Scaffolding**
- Teacher writes even if the student chooses not to and she never corrects the students writing. She does model the correct way in her response to the student.

**CONTENT AREA**
- Science
- Language Arts, Reading
- Math
- Social Studies,
- Art
- Music

## GLAD Strategy

### WHAT

<table>
<thead>
<tr>
<th>Team Building T-Graph</th>
</tr>
</thead>
<tbody>
<tr>
<td>Some ideas for character traits: Cooperation, Caring, Respect, Tolerance, Integrity ...</td>
</tr>
</tbody>
</table>

- In order to take risks, students need to feel safe in the classroom in large groups or small group settings.
- Students don’t always come to school knowing these character traits so they must be allowed the time to learn through group experiences, modeling, discussions, practice, and patience.

### WHY

- Working with teams and small groups

### WHEN

- In cooperative learning groups team tasks

### WHERE

- Team Tasks

### Groupings:

- Whole-Team-Flex-Individual

### Scaffolding

- Introduce a new trait with every new unit.
- Traits depend on the needs of the class.
- Class develops T-graph as a group and team points are given after team tasks to reinforce character trait being focused on.

### CONTENT AREA

- Science
- Language Arts, Reading
- Math
- Social Studies, Art
- Music
- All other content areas

### Picture File Cards

- Picture File Cards are one of the most valuable tools for any teacher when used to develop higher-level thinking.
- Use cards that are high interest or emotionally provoking
- Students will want to discuss them this builds language.
- Other activities such as writing, predicting, developing questions, classifying and assessment.
- Picture file cards can be used anytime throughout the unit of study

### Team Tasks:

- Used in place of centers,
- Give students needed time to practice before assessing.
- Once there are enough activities to keep the students engaged while teacher works with groups.
- Teacher doesn’t pull groups until students are able to work together as a group following the classroom expectations.

### observation charts

- Whole group
- Team task
- Flex group
- Individual
- ELL group

### Teacher must model activity and expectations more than once.

### Formative assessment of the students

### CONTENT AREA

- Science
- Language Arts, Reading
- Math

| **Listen And Sketch** | - This strategy encourages students to visualize a skill most struggling readers don't have.  
- Visualization is a strong way for the brain to learn. | We use sketch and write in learning logs, journals and assessment tools, thus allowing more access to ELD and visual learners. | Whole group teacher modeling | Whole group  
Team task  
Flex group  
Individual  
ELL group | Teacher modeling  
Individual portfolio | Science  
Language Arts, Reading  
Math  
Social Studies, Art  
Music  
All other content areas |
| **Ear to Ear Reading** | - Two students place their chairs side by side the seats face in the opposite direction.  
- When the students are sitting in the chairs, their heads and ears are close together, but their faces are facing the opposite direction. They each have the same reading materials; they take turns reading to each other (one line at a time). | It is a form of partner reading that lowers the affective filter. As research shows, with some cultures and struggling readers, the eye-to-eye reading is threatening. This is a great activity for building fluency and intonation skills. | Weekly  
With their assigned reading partner | Partners | Modeled by teacher  
When partners read teacher circulates around the room assessing students needs and progress 9  
Formative assessment | Reading  
Language Arts  
Science  
Social Studies |
| **Poetry Break** | - Students are assigned a day to present to the class.  
- Teacher models a poem a week going through the poetry break process. | This strategy develops fluency, word meaning, metacognition and oral presentation skills. | 10-15 minutes daily class is divided into 5 days. This activity is student lead by the weekly assigned poetry director | Whole Group poetry break presenters present to the class in the assigned presenters place | Teacher models poetry expectations weekly during poetry break choosing different poetry styles | Science
